

FYNDER is the ultimate plug-and-play edge sensor of its kind designed to enhance tactical awareness. Its unified connectivity and intelligent technology enables real-time sensor data collection, processing, and reporting of single or multiple users simultaneously across multi-domain operational environments. FYNDER seamlessly integrates with a variety of wearable devices, allowing it to collect a wide range of sensor data. FYNDER is designed to advance operational effectiveness by integrating intelligent mission-critical measurement sensors and mesh network interoperability across multi-domain operational environments.

KEY FEATURES

- Rugged, IP67, and impact-resistant housing
- Tactile buttons for easy basic menu navigation with or without gloves
- Low power usage and minimal thermal transfer
- Backlit display with adjustable brightness

FYNDER possesses mission-critical measurement sensors, mesh network interoperability, and integration for any mission.

DIMENSIONS	2.5" x 1.5" x 0.5"
POWER	6+ Hours
WEIGHT	.25 lb (0.45 kg)
RADIO	Integrated with secure wireless Adapter for any IP radio connection
RANGE	2-5 km with modular LoRa accessory
GPS	+/- 2.5m accuracy
SENSORS	-Barometer -Accelerometer -Altimeter -More optional
